Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Rech et al (U.S.P. 6,012,174). The patent to Rech et al discloses a novelty hat in the shape of a vehicle (a racecar or an amphibious vehicle), comprising a substantially planar top member 26, Fig. 3 having a front portion, a rear portion, and a first side portion and a second side portion (see Fig. 1), a substantially planar bottom member 12 having an aperture 22, a substantially planar body member 16, and wherein said top member is connectable to said body member and said body member is connectable to said bottom member to form said novelty hat in the shape of said vehicle.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Neppell (U.S.P. 1,418,198). The patent to Neppell discloses a novelty hat in the shape of a vehicle (a disc shaped air vehicle similar to the one commercially known as a Frisbee ®), comprising a substantially planar top member 11, Fig. 1 having a front portion, a rear portion, and a first side portion and a second side portion, a substantially planar bottom member 10 having an aperture, a substantially planar body member 12, and wherein said top member is connectable to said body member and said body member is connectable to said bottom member to form said novelty hat in the shape of said vehicle.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bacon (U.S.P. 2,497,527). The patent to Bacon discloses a novelty hat in the shape of a vehicle (an airplane), comprising a substantially planar top member 10, Fig. 2 having a front portion, a rear portion, and a first side portion and a second side portion, a substantially planar bottom member 24 having an aperture (the slits forming fastener elements 25), a substantially planar body member 23, and wherein said top member is connectable to said body member and said body member is connectable to said bottom member to form said novelty hat in the shape of said vehicle.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rech et al in view of Mahn, Jr. (U.S.P. 5,665,458). To construct the hat of Rech et al with the decal labels 20 being a part of a cloth laminate as suggested by Mahn, Jr. (at 11, 12, 24, Fig. 4, col. 1, lines 19-21 and col. 2, lines 13-62) would have been obvious since the decal label would present a more attractive appearance.
